

Manitoba Electrical Code Inspection Notice

Section 0 - Definitions

Effective Date:

Immediately

Scope:

To clarify what a parallel generator set is.

Requirements:

Section 0 - Definitions

The following is added after “Plenum”

Parallel generator set – two or more generators synchronized and operating as a single unit.

Rationale:

There are no rules in the Canadian Electrical Code for parallel generator sets. This is what Manitoba Hydro will accept for a definition.

Supporting Information:

Manitoba Electrical Code: Section 0 - Definitions
